532537257	10x6.5x11x6.5 NWPP Wine Bag, 6 Bottle	Premium,2CF/2CB,Pack=50

Frequently asked questions about reBags

When will I have to replace my reBags? The reBags should easily last 2 years with weekly use.

How much will the reBag hold? Our bags can hold up to 30-35 pounds. The weight constraint is typically based on what the shopper wants to carry, rather than what the bags will hold. We've found that two 1-gallon milk jugs (about 17 pounds) is at the upper limit of what most people are comfortable carrying at one time.

How do reBags compare to regular shopping bags? Our standard shopping bag can hold 2 to 3 times what a typical plastic bag can hold.

How many reBags will I need? A family of 4 will probably use 8 to 10 bags per weekly grocery shopping trip. But, it is a good idea to have a few extra bags to keep in your car, for unplanned shopping trips.

How do I keep my reBag clean?

You can hand wash reBags with water and a mild soap, as needed. Since the material used to make reBags is water and stain resistant, they are very easy to keep clean. A simple quick rinse in the kitchen sink is all that is needed. The bags will air dry quickly, do not put reBags in the dryer.

What material is used to make reBags? reBags are made with non-woven polypropylene, a breathable, water resistant material that is strong, durable, and lightweight.

Are reBags recyclable? Absolutely! They are listed with the recyclable symbol #5, the same recycling properties as yogurt containers and syrup bottles. Please check with your local recycler to see if they accept polypropylene with the #5 material specification.

What is the minimum order for custom printed bags utilizing our stock film colors? The minimum order is 2,000 bags.

What stock film colors are available? Stock film colors are green, black, blue and tan. For custom film colors any PMS color can be utilized.

What is the minimum order for custom printed bags utilizing a custom film color? The minimum order is 10,000 bags

What type of art must be supplied to us so we can print reBags? Art needs to be EPS vector line format.

What do printing plates cost? \$50 for each color utilized in the print. We can print up to 5 colors 2 sides. If the print is different from front to back additional plates will need to be purchased for each color.

Can the bottom of the bag and the sides of the bag be printed? Yes! There is an up-charge for printing on the sides or bottom of the bags.

Can a custom size reBag be produced? Yes! Any custom size or custom feature can be produced and/or added!
