Improved Conventional Foam Hinged Lid Containers

Optional Venting System

The Optional Push-In Vents keep products fresh and crispy and reduces costs by eliminating the need to purchase a separate vented container.

Convenient Stackability

Improved container geometry enhances container strength and provides the ability to stack multiple containers for convenient transport.

Improved Closure Mechanism

The redesigned closing mechanism keeps the container securely closed and prevents the container from inadvertently opening causing messy spills.

Perfect Cube Case Packs

Efficient case packs require less space for storage, reducing warehouse space and provides room to store additional products.

Temperature Guide

PS Foam (0°F/18°C - 150°F/66°C)

These guidelines are supplied to assist you in determining the proper use of Pactiv products. They are based upon testing and published guidelines and are reliable in most applications. However, because every food supplier's recipes, ingredients, processes and supply chain is unique, these guidelines are not a substitute for product testing. Confirmation of product acceptability under your specific conditions of use must be done by you.
