

FOOD PROCESSOR

SEGMENT PRODUCTS

Food processing is an increasingly important part of our food supply as consumers demand convenience and restaurants and institutions stretch to do more with less. This represents a growing need for consistently high quality papers used in these processes.

With three facilities and the ability to coat and convert a wide variety of materials, McNairn Packaging offers products that are part of your solution. ASI certification and HACCP professionals at McNairn Packaging assure you that we meet the highest sanitation standards in slitting, rewinding, sheeting, die cutting, printing, interfolding and custom sizes. Four colour process printing of most products is available to distinguish and define your products.

McNairn is your supplier of choice for a flawless supply chain that keeps your plant running, eliminating down time and food loss.

DESCRIPTION

HIGH PERFORMANCE DRY LOIN WRAP

This product covers the sides and loins of fresh pork or beef. It helps protect the freshness and flavour of fresh meats and prevents direct contact with corrugate.

GENUINE VEGETABLE PARCHMENT PAN LINERS

Made from pure cellulose, our GVP pan liners have strong wet strength properties and perform well when exposed to moisture and grease. They're great for eliminating costs associated with greasing and cleaning up pans. Some pan liners are multi-use.

DRY WAX SHEETS & ROLLS

An excellent interleave for pastry crusts and manual or automated equipment. Provides protection release and hygienic features for "dough" related products. An excellent over wrap or display sheet for produce and fruit products. Scale paper is offered in heavy duty and medium weight.

WET WAX SHEETS & ROLLS

Basis weight available for various applications. Used as a protective wrap or interleave sheet for meat, dairy, fish & poultry products. Allows for protection for extremely wet applications such as corrugated box liners for fish and chicken. Also used as a drying sheet for chocolate and confectionery applications.

POLY COATED DOUBLE SIDED WHITE BOARD

Used as a unit count sheet for interleaving applications. Also offered in lightweight waxed boards.

INTERFOLDED HIGH DENSITY WRAPS

This grease and moisture resistant sheet is excellent as a separator sheet or a box liner for meat, fish and poultry. Interfolded sheets provide quick accessibility and ease of use.

FORMATIC PATTY PAPER

Used on most automatic patty machines. Can also be used as an interleaver for cheese and deli meats. Custom sizes available.

BAGS

Paper, Wax, Foil, Glassine, Laminates

We offer a wide array of bags in both stock and custom sizes. Our state of the art bag making equipment creates high standard bags with low minimum runs. Our design department can create eye-catching designs and prints that create the right bag for you.
